

Ormuko Stack

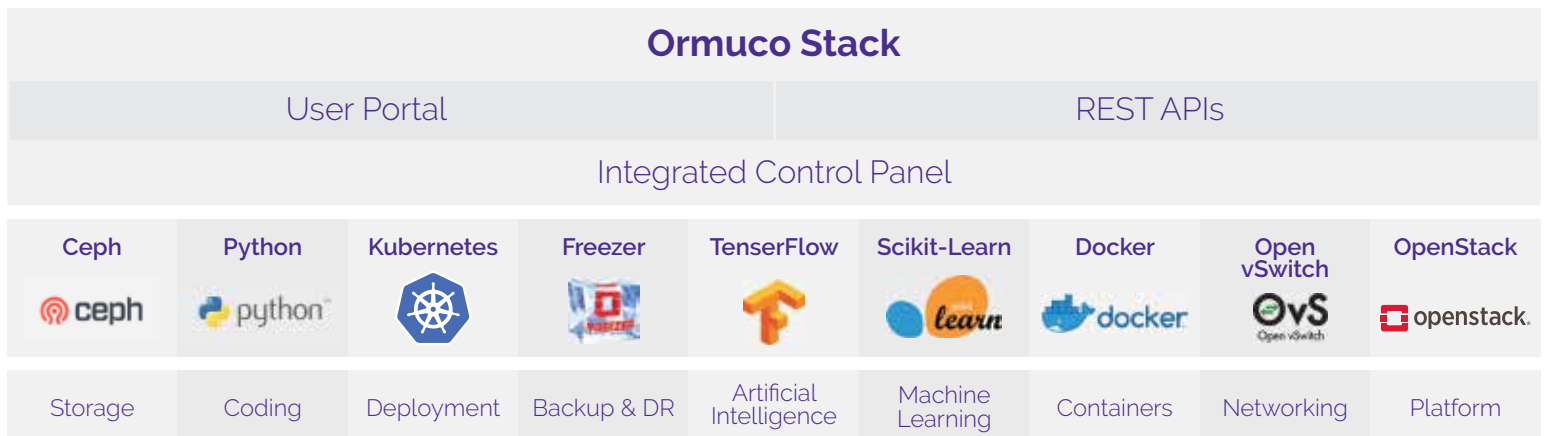

A Complete, Turnkey Cloud Management Solution & Edge Platform Built on Open Source

Overview

Built with the best of pre-packaged open source tools, Ormuko Stack combines cloud orchestration, workload consolidation, artificial intelligence and machine learning capabilities into a single platform.

The software enables businesses to benefit from the most recent and popular virtualization features, including for storage, network, compute and database, within their own infrastructure.

Ormuko Stack adds automation to its cloud and edge management functionalities, enabling your platform to self-operate and self-heal. It can analyze and predict faults, then adjust your resources in real-time to prevent failures.

Benefits

Cloud & Edge Support

- › Ormuko Stack is your complete, turnkey solution to deliver edge, private, public and hybrid clouds for more than one organization.
- › Manage infrastructure across different data centers and different geographic locations, including edge cloudlets, from a single portal.

True Flexibility

- › Choose between containers, virtual machines or bare metal to deploy your workloads, using any x86 hardware technology, including IoT gateways.
- › Import VMs from off-premises vendors like AWS, MS Azure and Google Cloud.
- › Access the portal through UI or command line, and extend capabilities through APIs.

Comprehensive Feature Set

- › Experience absolute multi-tenancy, scalability, redundancy, and performance granularity, with metering, activity logs, and more.
- › Ormuko Stack includes automated provisioning, seamless authentication, billing, support, API documentation, feedback options, and more.

Built-in Security for Better Compliance	<ul style="list-style-type: none">› Use multi-factor authentication, SSH key pair authentication, and single sign-on.› Your data is protected at rest and in transit with encryption.› Your platform is safe with anti-DDOS protection.
Zero-touch Management and Updates	<ul style="list-style-type: none">› Ormuco Stack is delivered using the CI/CD development model that enables seamless delivery of updates and upgrades, as required.› Your platform is always running the most recent and stable OpenStack release, as our R&D team is constantly working on delivering the latest features.
Intelligent Software	<ul style="list-style-type: none">› Ormuco Stack uses artificial intelligence and machine learning to self-heal, optimize and automate your infrastructure.› No further human intervention is required on the software stack.
Lower TCO & Higher ROI	<ul style="list-style-type: none">› Integrated automation will help reduce your total cost of ownership by up to 70%.› Thanks to open source technologies, you're free from high licensing costs, guaranteeing a better return on investment.

“ With ormuco, we can support 100 percent of our customers’ workloads, whether on or off premises. The private versus public cloud debate is, therefore, over. ”

Luiz Carlos Faray, IT director of B2B, Oi Brazil
