

Ormucoco Stack

A Complete, Turnkey Cloud Management Solution & Edge Platform Built on Open Source

At a Glance

Build edge, private, public and hybrid clouds with Ormucoco Stack. Rely on the most recent and stable open source technologies to offer cloud-native services that fit your end-users and customers' needs.

Made for Cloud & Edge

Ormucoco Stack is neither a simple hypervisor nor a monitoring platform. It's a complete solution to deliver any clouds and edge platform from a single portal.

Best Customer Experience

Ormucoco Stack includes billing, support, activity logs, API documentation and feed-back options, so you can provide the best customer service.

Built-in Security and Multi-Tenancy

Ormucoco Stack comes with advanced encryption and authentication functionalities, and is set for multi-tenancy with white-label features.

Set Yourself Free

Escape vendor lock-in with Ormucoco Stack. Import VMs from any public cloud operator. Your workloads can be deployed on containers, VMs or bare metal.

Feature List

Flexible Computing
