

INFRASTRUCTURE AS A SERVICE (IAAS)

For small to hyperscale-style
infrastructure as a service,
with bare metal, virtual machines,
containers, and more

**Unleash Your Infrastructure's Full Potential
with the Best Technologies on the Market**

Software-defined
network, compute
& storage

Docker
containers
& Kubernetes

Latest
OpenStack
components

Built-in
automation
& orchestration

White label,
billing
& support

DEVELOP, TEST & DELIVER NEW SOLUTIONS FROM ONE PORTAL

API Management

Add as many features as you want by integrating popular solutions using RESTFul APIs.

App Center (Marketplace)

Install approved platforms such as WordPress directly from the Marketplace.

Publisher Portal (My Apps)

Deliver and sell web, mobile and IoT applications right from the portal.

Database as a Service (DBaaS)

Deploy SQL and NoSQL databases offered "as a service". No need to install servers.

Ormuko IaaS is a fit for service providers and enterprises willing to solve challenges that cloud hyperscalers can't: latency, data privacy, high cost, and flexibility.
